# Meywalk®4 The Dynamic Walker

The users of the new Meywalk®4 are typical wheelchair dependant persons of all ages that require a high degree of aid and support to stand up and walk.

At the same time Meywalk®4 offers the user more quality of life in the form of enabling the user to take part in everyday activities and make decisions by him or herself.

Meywalk®4 is the fourth generation of the well-known Meywalk® product family and is now presented with new and improved features to further aid and support the user in their daily life.

## The Springy Walker

Meywalk®4 stands out in the market of assistive technology by being spring suspended. The springs stimulate the muscles of the user and the movements that are a part of a natural gait are imitated. This way the gait pattern is developed. Furthermore it has been observed that the suspension system often motivates users with intellectual disabilities to move around, thus creating a platform for further development.

In practice the upper part of the frame follows the movements of the user and provides optimal support during the various phases of gait.

## Dynamic Saddle Seat

A new feature on Meywalk®4 is the dynamic saddle seat that also encourages the movements of the user. The rubber suspended seat allows for a certain degree of hip rotation during gait. When the user walks the saddle seat follows the sideways movements of the hips. The user is always brought back to the starting position during the various phases of gait in a gentle and safe manner. The dynamic seat is unique to the Meywalk®4 and is different to earlier generations of the Meywalk® Family.

## Fighting Gravity

The dynamic seat and the padded trunk support of the walker support the user and help to keep the body erect. Both seat and trunk support are infinitely adjustable in height. This way the walker can be fitted precisely to the user and allows for growth.

Furthermore it is possible to adjust the angle of the seat and trunk support so that the user can place him or herself anywhere between a vertical to slightly forward position, this may support gait function. This product is primarily for indoor use but it is also very suitable for outdoor use on hard flat surfaces. We recommend that the user is supervised at all times in the walker.

## Facilitated Access

As known from the previous Meywalk® models getting in and out of the Meywalk®4 is quite easily achieved by way of the built-in swing bar that lowers and raises the seat and trunk support when the assisted user enters or exits the walker.

## Tool-free Adjustments

Meywalk®4 is available in four sizes and can be adjusted to fit the needs and size of each individual user. All settings can be done easily without the use of tools which is a great advantage during active and busy days. Most surfaces on the walker are either coated or upholstered with closed surface polyurethane that ensures longevity, easy maintenance and cleaning.

## Heavy-duty

Many have asked for a walker of this type for those users that weigh more than 100kg. This has now been made possible with the Meywalk®4 which has been tested and approved for users with a body weight of up to 130kg.

Meywalk®4 comes standard with dynamic saddle and rear stop, handle bar, trunk support in the required size, parking and drag brakes, non-reverse function. Front wheel swivel locks and springs that match the user's body weight.

## The trunk support for Meywalk®4 is available in five sizes:

Circumference 70cm, 90cm, 105cm, 120cm and 130cm.

## The springs are available in seven variations:

- :: Orange springs for 10-15kg
- :: White springs for 20-50kg
- :: Yellow springs for 45-65kg
- :: Blue springs for 65-80kg
- :: Red springs for 80-100kg
- :: Silver Springs for 100-130kg

Meywalk®4 enables the user to take part in everyday activities

## The Right Match

An extended range of accessories are available for Meywalk®4. The accessories ensure that the walker will match the specific needs of the user:

- :: Trunk Pad
- :: Hip pads with trunk pad
- :: Leg divider
- :: Leg guides
- :: Small swing bar for medium
- :: Anti-tip support
